Editor's pen...

I extend my greeting to all the readers of 'Senhri', 17th annual magazine of Govt. Ziritiri Residential Science College. First and foremost, I give my whole-hearted gratitude to God for giving me the strength and encouragement needed for the completion of this magazine and all my colleagues and friends who had contributed their works and effort. It is such a privilege and honor to be able to publish this annual magazine for the college. It gives me great pleasure and a hearty satisfaction to see that this issue has been built up and completed successfully, considering all the hard works and problems that had been endured for the publication of the same.

It is not a walk in the park to be able to publish this annual magazine. We had to faced certain difficulties and tasks, as we go along the way but strength and encouragement were given in times of need to surmount them from our All-powerful God. To all the contributors, I bestow upon you my inexpressible gratification and I want you to know that I could have never done it without you. Had you not contributed your work, then the endeavor would prove a resultant failure. I would also like to extend my heartfelt gratitude to Mr. C. Hmangaihrampuia (Assistant Magazine Editor) for his support, aid and helpful suggestions throughout the session and to the members of the editorial board, Miss Laltluangkimi Hnamte, Miss Lalmalsawmi, Sir Lalhmingliana Hnamte, Sir Thangkhanhau, Miss Lalthanpuui Ralte and Sir C. Lalngaihawma for their

helpful advices, useful suggestions and opinions in the compilation of this session's issue.

I, especially, would like to give thanks to my preceding Magazine Editor, Mr. Isaac Lalhmangaihzuala for elegantly designing the cover and for the compilation of this session's magazine and to Mr. C. Lalramchhana (General Secretary, SU 2018 - 2019) for all his aid and help for the accomplishment of successfully publishing this magazine. Taking a couple of moments to look back, the three years experience this college has given me was precious and worth one's while. Had I the power to change the outcome the circumstances and I produce, I would have certainly not! It has been a wonderful three years of my life in this college and to the current students of Govt. Zirtiri Residential Science College, I say, hard work and effort pay off. To the outgoing students, I bid you farewell and good luck for your future endeavor. God bless!

It is a pleasure to learn that the Students' Union, Govt. Zirtiri Residential Science College, Aizawl is bringing out 'SENHRI', the annual college magazine for the year 2018-2019.

We now live in an age where science and technology is very important, both as a field of study and in its resultant professions and also because the advances made in this field have made human life considerably easier. Can we imagine our lives without electricity, mobile phones, commercial flight or the internet, to name a few? The advancement of technology coupled with a highly globalised world means that knowledge and skill are paramount wherein one has to constantly reinvent oneself to retain that competitive edge over others. Therefore, it is imperative that students, whether of the sciences or the arts, make full use of the opportunities that are presented to them in terms of education and self-growth, always remembering that mediocrity is seldom rewarded in the real world.

Hearty felicitations to the staff and administration of Govt. Zirtiri Residential Science College for a commendable job in imparting education to our students in the sciences. I also

convey my best wishes to the editorial board of this magazine and to all students of the college, for success in their studies and future endeavours

FOREWORD

First of all, I congratulate all those who are completing their undergraduate course during the year. I expect them to keep in touch with us as alumni members, through tools like email, WhatsApp, Facebook, LinkedIn, Instagram, etc.

This year, 110 candidates have cleared the UG course from the three streams offered by us. The following data is a 4-year abstract of our performance in the end semester examinations:

2019 (passed out 110)

BSc - 75 (13 rank holders)

HSc - 18 (7 rank holders)

BCA - 17 (3 rank holders)

2018 (passed out 80)

BSc - 60 (9 rank holders)

HSc - 7 (4 rank holders)

BCA - 13 (4 rank holders)

2017 (passed out 75)

BSc - 55 (14 rank holders)

HSc - 8 (4 rank holders)

BCA - 12 (5 rank holders)

2016 (passed out 92)

BSc - 57 (10 rank holders)

HSc - 15 (6 rank holders)

BCA - 20 (6 rank holders)

In the past few years, we have seen a number of developments in terms of physical infrastructure building. The main academic building costing Rs 650.00 lakhs received under SPA is on the verge of completion at Durtlang Leitan campus. The other construction works which have been completed are:

- a) Library building (Cost: Rs 130.00 lakhs, SPA fund)
- b) Laboratory building (Cost: Rs 140.00 lakhs, RUSA fund)
- c) Girls' hostel (Cost: Rs 80.00 + 70.00 lakhs, DoNER & RUSA fund)
- d) Boys' hostel (Cost: same as Girls' hostel)

Under the state government's NEDP scheme, a new college bus has been purchased to replace our 22-year old bus. The vehicle was flagged off on 9.7.2019 by the Minister i/c H&TE along with 9 other buses purchased from the same scheme. However, it is with a deep sense of regret that we have to bid farewell to our bus driver Mr Lalzira who passed away after a brief illness on 19.5.2019.

During the past 1-2 years, the college library and laboratories have been strengthened through funds received from RUSA and the state government's NEDP scheme. RUSA 2.0 is underway with a total allocation of Rs 200.00 lakhs for our college. This is expected to facilitate a major facelift for the college.

In recent years, Govt. of India has come up with a number of digital initiatives like National Digital Library, National Academic Depository, Digital India, Skill India, e-Shodh Sindhu, etc. Today, knowledge is available through MOOCS and the internet in computers, tablets and mobile devices. Through this teaching learning system 2700 courses are being offered by the best faculty in India, in all domains free of cost. You are strongly encouraged to make the best use of these digital tools.

We should, however, always remember that mere accumulation of knowledge is of limited practical use unless it is translated into innovations for economic and social values.

Lastly, I want to put on record the hardwork rendered by our Students' Union, and all their contributions towards the welfare of students. I congratulate the teaching and non-teaching faculty for yet another successful academic session. I am also grateful to the editorial team for bringing out this version of our college magazine.

May you keep the torch burning to lighten your respective corner. God bless you all.

Message

Heartfelt greetings to all. I would like to give thanks to The Almighty for His grace and guidance and enabling us to complete our duty as Students' Union Leaders.

I would also like to congratulate the Magazine Editor and his assistant for successfully bringing out the 17th edition of the College Annual Magazine. I express my gratitude on their excellent work and commitment.

During the 2018-2019 SU term, we were saddened by the untimely passing away of the parents of some of our fellow students. I extend my heartfelt sympathy for them and the SU had given citation in memory of their loved ones.

Our respected principal and professors, in-charge of SU had given their full cooperation in all our endeavours such as maintaining discipline in and around the college campus. We are happy to see a great change in discipline as a result of this and I hope this trend continues in future

Under the guidance of The Almighty God, we were able to finish the College Week without any problems and were also able to take parts in the MZU

sports. I take this opportunity to thank our respected principal, professor in-charge of sports and all the professors and staff for their support and useful advices.

I am happy that our college has given special quota for sportspersons. I hope this would bring more achievements in sports for the college in future.

I am happy to report another great achievement during our term. Youth Adventure Club was formed which has been closely working together with the SU. I wish the very best to them in their future endeavours.

I must not forget to mention the Evangelical Union, who had been devoting their time for all the students and the college through their prayers and everready helps. I wish them all the best and may God bless their service to Him to bring students closer and uplift their spiritual lives.

There are so many things that I am thankful for during my tenure as Vice President in the SU. Since the day I took charge till today, we, the SU leaders have received support and advice from our principal, professors in-charge and the Sports Committee.

The buildings at the new campus is almost ready for accommodation and I am happy for that. I wish the very best to my dear colleagues, teachers and all the students. Let us all continue to carry with us our motto, **Lighted to lighten** wherever we venture in life. Long live GZRSC.

Expedition of Dilmawi was the main objective , and was successfully completed by the participants from this college .

19th ADVENTURE COURSE :

Organised by Department of Sports and Youth Services , during 30th November – 24th December , 2018 . The Zirtirians Club' Fin. Secretary , *LaltAhafamkima* participated in the course . He was recommended for other Adventure sports training as he finished the course in 'A' grade . Organisers reviewed him as “ *A well disciplined and tough trainee who took keen interest in the course and achieved average standard in theory and*

practical . His performance in Jungle survival management was good . He trekked 65 Km during the course .” He is indeed , the very first of our college to finish such course !

FIRST BASIC CAMP :

Organised for the very first time by Zirtirians Youth Adventure Club , during 14th – 16th March , 2019 , at Ailawng Base Camp , Mamit District . 28 (14 boys and 14 girls) participants attended the course , all from the college – guided by the 6 Office Bearers. 8 tents were set up as Camp-fire was prepared every night . Participants were taught Rope-Knot and equipments were introduced . Rapelling was conducted at Ailawng Tuikhur and at the very famous peak of Reiek . Expedition of Khuangchera Puk also took place under the guidance of Sir Lalremruatfela and Sir Pc-a .

This first ever Basic Camp conducted by our club has lit fire in the heart of the participants ; raising their morals on leaps and bounds . The participants , all being a student of Govt. Zirtiri Residential Science College , has grown to love the college and the club . It is through this camp , that they have learned to respect their seniors . It is through this camp , that they have the inspiration to be the pride of the college . On behalf of all participants , on behalf of my fellow Office Bearers and on behalf of The Zirtirians Youth Adventure Club , I thank all teachers who strived for this club , for this opportunity given to the participants – for without your effort , all this blessing bestowed upon us would not be possible .

VOTE OF THANKS :

A very generous ‘*Kan lawm e*’ to the professors-incharge , who worked for the initiation of the very first Adventure Club in GZRSC and all students who participated in activities throughout the year . Another ‘*Thank You*’ to the Students Union who also lend permission when needed . The Club could have never functioned without your efforts .

We hope that this club continues to strengthen bonds for the students in GZRSC .

“Youth is the spirit of adventure and awakening . Instead of trying to make your life perfect , give yourself the freedom to make it an adventure . One way to get the most out of life is to look upon it as an adventure . So , my question is whether you are going to say ‘ YES !’ to your adventure .”

Zirtirians YAC , GZRSC .***

Report From
RUSA

Dr. R. Lalengmawia

Institutional Coordinator. RUSA

RUSA (Rashtriya Uchchattar Shiksha Abhiyan) or “National Higher Education Mission” is a holistic scheme of development for higher education in India initiated in 2013 by the Ministry of Human Resource Development, Government of India. It aims at providing strategic funding to eligible state higher educational institutions. The central funding is norm based and outcome dependent. A total of 316 state public universities and 13,024 colleges are covered under it. RUSA aims to provide equal development to all higher institutions and rectify weaknesses in the higher education system and also to raise the gross enrolment ratio (GER).

Needless to say, like all other state run colleges in Mizoram, RUSA is the main lifeline of our college, Within a period of 2016 to 2018, we received two types of grants from RUSA as under –

1. Equity Initiatives grant amounting Rs. 15,62,501.00
2. Upgradation of existing colleges to Model Degree Colleges – Amounting Rs. 4,00,00,000.00

This year also, we have received the last installment of Equity Initiatives grant under RUSA amounting Rs. 6,38,889 and First installment of Infrastructure Grant under RUSA 2.0 amounting Rs. 1,00,00,000.00 is hoped to be released soon.

Activities and Achievements under RUSA 1.0

The activities and achievements under RUSA 1.0 is tabulated below –

1. **EQUITY INITIATIVES GRANT:** Below are some of the activities under Equity Initiatives during the year 2018 -2019

Course 2019**

Lalrinsangi Nghinglova

*Member Secretary
Student Support Committee.*

Personality Development: *Personality is the sum of the characters that constitute the mental and physical being of a person including appearance, manners, habit, taste, and even moral characters. The personality of a person constantly undergoes a change and it can be developed for the better.*

Soft Skills Development: *It is a term associated with the “EQ” (Emotional Intelligence Quotient) of a person. It consist of personality traits, social graces, communication, languages, personal habits, interpersonal skills, leadership, team-building etc.*

About the course: *Our programme seeks to adopt a holistic approach to learning. It will work towards building confidence, mental health, image and creativity enhancement. It aims at bringing about positive change in our students who are positioned to face the greater challenges of life as they graduate from the college.*

It will also equip the students with the essential etiquette, protocol knowledge and refined social skills to enable them to face any social situation with confidence.

Target Group: The course is intended for the outgoing/final year students of all streams. Interested students may get themselves registered at the beginning of their final semester

During 16th May -22nd May 2019, the seventh batch of final year students underwent a short term course on Personality Development . This program was introduced in 2013 to provide necessary life skills to the outgoing students of all streams. The course was organized by the Student Support Committee under the supervision of the IQAC and was sponsored by RUSA. The course, having met with an overwhelming response from the students since its inception, has continued since it was introduced six years ago. The course aims at imparting knowledge and skills that will benefit our students as they pursue higher studies and look for jobs. This year we had 120 students who registered for the course out of which 84 students attended.

The first day opened with sessions on life Skills and Interview skills which were imparted to the students by Mrs Rinthanpuii , Project Assistant SSA Missions , who had worked as a trainer at Infosys and also in Taiwan in the past years. She has been lending her expertise for the past six years and from the feedback of the students, her sessions were extremely useful and interesting.

On the second day of the course, the session began with a well-prepared presentation on the topic of Entrepreneurship from Lalhruiatlunga, a renowned consultant from our college. With the ever-increasing number of graduates every year, finding a good placement especially

in Government Jobs has become the greatest challenge. Hence it was felt that students should be taught to be self-sufficient and innovative. The session on entrepreneurship proved to be highly relevant. In the next session, students were given career counseling by the same resource person. The students found the session very crucial for their further studies and career options.

The present age has seen many youths afflicted with stress and depression, which sometimes lead to suicide. Hence, stress Management and mental health is of great importance to students who are to face different challenges of the modern era. For this purpose an expert from Pachhunga University College, Dr.Rinpari Ralte Puchhunga was invited. Her lectures on stress management and mental Health on the third day were received with great enthusiasm from the participants. The third day was also utilised for a session on Professionalism and Etiquette by Ms Susan R Ralte, an expert from Women's polytechnic. The session was extremely relevant and practical.

The third day was spent on preparation for the closing program and farewell dinner. The closing function and farewell dinner was organized on the 22nd May 2019. The program was chaired by Dr.Lalzahawmi Chenkual.

The Principal, Mr.Laltanpuia gave the welcome speech which was followed by report from Mrs Lalrinsangi Nghinglova. Dr R. Lalengmawia RUSA Co-ordinator distributed the participation Certificates. The organizers thanked the Principal, RUSA Co-coordinator, IQAC and the administrative staff for their endless support in organizing the course. In spite of some shortcomings the entire course met with a great success and the students were extremely satisfied, as learnt from their speeches and feedback.

The college intends to continue with Personality Development Program which had been included as one of the Best Practices of the institute. It is the ultimate aim of the college to provide holistic development to our students and make them educated and employable, to enable them to finally realize our ultimate goal “Lighted to Lighten”.

Report From National Service Scheme (NSS)

*Lalnunthara,
Programme Officer*

It is indeed a great privilege for me to give a brief report on the activities of NSS Unit, Govt. Zirtiri Residential Science College during the Academic session 2018 – 2019.

With regard to the NSS scenario in Mizoram, this unit is the seventh in seniority and has been allotted six units of volunteers for the session 2018 – 2019. Almost all the volunteers are actively involved in creating assets for the community as well as in generating health and environment protection issues. Some of the most important activities undertaken by this NSS unit may be summarized as follows:

REGULAR ACTIVITIES:

April 2018:

Two Programme Officers attended training on Public Financial Management System (PFMS) on 2nd April, 2018 at SNO office, Aizawl.

June 2018:

1. As per initiative taken and supervision of SNO, NSS (Cell), our NSS unit had successfully observed Green Mizoram Day on 11th June, 2018 at the NSS Plantation side which is located on the road side of Hmuifang. In this programme, four Programme Officers actively participated. Cleaning of plantation site and fencing of the newly planted saplings were done and 7 nos. of new saplings were planted to replace the unsurvived saplings.

July 2018:

1. On 6th July, 2018, Planting of Flowering trees at Sihhmui - Airport Road was organized by SNO in collaboration with Tourism Department, Govt. of Mizoram. In this programme, 3 Programme Officers (2 Males & 1 Female) and 40 Volunteers (27 Males & 13 Females) were participated.

2. On 25th July, 2018, 'Orientation Programme Cum Blood Donation Campaign' for NSS volunteers was conducted at the College Auditorium in which Mr. C. Lalremruatfela, PO NSS talked about the history, aims & objectives of NSS. 4 Programme Officers and 270 Volunteers attended the programme. This kind of programme is used to organize every year especially for the newly admitted 1st semester students as many of the Higher Secondary Schools do not introduce NSS in their schools. As such, this Orientation Programme was organized to make the 1st years' students aware NSS history, aims & objectives. 4 persons from Association for Voluntary Blood Donors (AVBD) were also participated in this programme in which Mr.C. Lalnunnema, President, AVBD gave the awareness speech of blood donation.

August 2018:

1. On 22nd of this month, cleanliness work for the streets of Aizawl City and A.R. Ground was organized by SNO, NSS Cell. Two Programme Officers and 23 Volunteers were participated in this programme. The NSS volunteers present at the cleanliness work thoroughly cleared the target area of waste materials like paper, polythene, sticks, and empty pockets of snacks on the main road. This programme lasted for three hours and light refreshment was served to all the participants.

2. On 29th of this month, cleanliness drive was organized at the College new campus, Durtlang Leitan. Two Programme Officer and 10 Volunteers were participated in this

programme. Cleaning of College new campus was jointly organized by N.S.S unit and College Cleanliness committee.

September 2018:

Some of the activities during the past academic year be are as follow :

- 1) Preparing Academic Calendar for the odd semester 2017 and even semester 2018:-**The committee prepared the academic calendar before the start of each semester. The work calendars were worked out in tandem with the earlier calendar and endorsed to General Body Meeting. After acceptance from the General body meeting, the calendars were printed out and displayed.

- 2) **Preparation of College Year Book 2018:** The Editorial Board for the Year Book started collecting reports from various Departments, Committees and Cells which could also be utilised for future SSR for NAAC accreditation.

- 3) **Assigning mentees to mentor, compilation and review of mentoring report:** As per the standing practice of the IQAC, mentoring system during the reporting period was kicked off again at the start of the academic session by assigning each teacher 5-10 or more mentees. Mentors gave reports about their mentoring after two weeks of the first and second inter assessments in each semester.

- 4) **Compilation of Monthly Department Report and review:** All the departments submitted their monthly reports before the 15th of the next month which was compiled and reviewed at the end of each semester by the IQAC Committee. In addition to this monthly report, Annual Departmental Report was also collected from each department for preparation of College Year book.

- 5) **Appointment of Faculty members to prepare Master Routine for BCA, BSc and BHSc classes:** Dr. R.Lalengmawia was appointed to prepare Master Routine for B.Sc. while BCA and Home Science Master routines are prepared by the respective departments.

- 6) **Proposal of subject in Lieu of History of Science for Home Science to the concerned authority in MZU:** The IQAC resolved to make a proposal of subject to be introduced in lieu of History of Science for Home Science students to the concerned authority at MZU. Principal and Teachers from Home Science Department were appointed to take care of the matter. It was great to see the success of the proposal that Home Science students would now learn History of Home Science instead of History of Science as one of the foundation courses in the undergraduate studies.

7) **Awarding of best Department:** Best performing department for the year 2017-18 was selected on on the following criteria:

- i) Regularity of submission
- ii) Activity of the department through their reports
- iii) Submission of supporting documents and evidence

Electronics Department was selected the best Performing Department during 2017-18. The award was given during Freshers' Social on 11.7.2018 which was a beautiful citation.

8) **Organizing Parent-Teacher Meet:** On 30th August 2018, Parent-Teacher Meet was organised for parents of first semester students. Being an important stakeholders in the college, these parents were informed about the examination system and rules and regulations of the College. A joyful time of interaction with Principal and faculty members of the college with parents was held.

9) **Organising short term course on Personality Development in Collaboration with Students' Support Committee:** The IQAC with the Students Support Committee organised Personality Development Programme during 21st -25th May, 2019 for out-going students.

Let us all work together to serve our college to the best of our ability as our motto, "Lighted to Ligten".

Day 8 (18.6.19)

118HU

This helicopter unit is responsible for the air maintainance in the northeast where plane cannot land . Their task is carried out by the mighty Mi 17v5 ,which cam carry a weight almost its own weight, plus which can also be used for close air support for group toops. It was a great day to explore this air craft by thinking about his role in the last indopakistan war. I say it was a great honoured to sit in its cockpit.

Day 9(19.6.19)

ATC Guwahati

On this day we have a rare chance of access to Air Traf?c Control of Guwahati airport. We went up to the control tower after short brie?ng abuot thei works, there we witness the works in front of our face and learn how the busy air traf?c is maintained . After that we went down to the room where the highly quali?ed persons are working with the rader which cover all over northeast to prevent aireal disaster. It was so great that we say nothing but watch and listened to what they do and say.

Day 10(20.6.19)

42 R&SU

Repair and Salvage Unit is responsible for the repair of any type of aircraft in the station and retrieve the air craft in case of crash. This day we were briefed by a nice presentation to let us know about their unit and how they will work in peace and war time.

Day 11(21.6.19)

33 MCU

Movement Control Unit provide and maintain the aircal transportation services of indian arm forces. On our visit to 33MCU they take us to each and every section of the unit after they brief us about their unit. They show us their different types of loading vehicles , how they maintain the delivery for many locations and how they provide free transportation for military personnel. After they took permission for us to explore and see the massive HERCULES and IL 78 which they used to carry heavy load.

Day 12(22.6.19)

NDRF (National Disaster Response Force)

On this day we visit the HQ of 1st Battalion BSF who are the part of NDRF in the northeast. Here we have a class by the Training Commander of NDRF with a nice presentation about how NDRF works and respond to disaster . They also put out all their equipments to show and teach us how they works and when to used.

On 23.6.9 the camp was of?cially end and all the cadets are send back home after the last fallin when we have a small farewell ceremony and depart to our own way after giving us the camp certi?cate and movement order.

Us, the cadets of 1MIZO AIR SQD NCC also reached aizawl about 1100hrs save and sound after spending over 20 hours long journey.

We are very grateful to our CO WG CDR S Nitin and all the staff for their support and guidance throughout the camp . I wanted to thank and give my sincere gratitude to our Principal and CTO Miss MS for allowing us to attend this camp. I might add that it was a nice and comfortable camp , we had learnt alot and gained so many knowledges which will be a live long values for us. Jai hin

GENESIS

- *Nick Lalrinmawia* ,
6th Semester , Botany .

Genesis ‘ is the beginning ; the origin of our college - a college that is currently the only college that offers pure science education in the State of Mizoram , the Songbird of the North East . With ‘Lighted to Lighten’ as the motto , it is located in Ramthar Veng , Aizawl and is currently affiliated to Mizoram University . A college that was started by Pi Lalziki in 1980 , initially as a women’s college offering Arts Stream and Home Science . A college , that now holds a record for the longest name ; which we gladly know , as the ‘ *Government Zirtiri Residential Science College* ‘ .

It was 12th June , 1888 , in London , England , that Edith Mary Chapman (Pi Zirtiri) was born . Who would have known at that time , that she would lead into the sequence of events that ignited the light of our college ? Being the eldest of three daughters and having been brought up by devoted Christians , she strongly wanted to be a Missionary - to bring light to someone’s life . Upon finishing her studies , she set sail to India . As she reached India , Bombay in 7th March , 1919 , the Lushai Hills (now known as Mizoram) was in great need of a woman Educationist .

That was the perfect place set by God , for the passionate lady to carry out her missionary work - a work that would later enlighten thousands of lives .

Pi Zirtiri stayed with the Missionary couple , Rev. and Mrs. Lorrain. Pi Chhumi (L) assisted Pi Zirtiri , taught her the mizo language through signs ! Pi Zirtiri was determined to teach the mizo girls . She offered education , ignoring all oppositions coming from the mizo men ; girls were not expected to study during such times due to patriarchy in the society . The determined lady , with the support of a God-sent Lady Missionary , Miss Marjorie Clark (better known as Pi Zolawmi) , forged education available for orphan-babies by opening a school ! Initially , mizo parents were reluctant towards sending their daughters to school . However , upon witnessing the improvement among the orphans , along with the lady's closeness to God , the people of the area soon bestowed their trust upon her .

Alas ! She had won the hearts of many . A good deal of parents were willing to send their

girls to school , where they were taught how to cook wholesome food , animal husbandry , gardening , hygiene , medical care , and caring for younger siblings . Domestic science , which we now call '**Home Science**'

was started by her in Serkawn Middle School

In such a way , she greatly increased the productivity of the girls , establishing an essential position for the girls in the Mizo community .

Girls who finished such course were assigned to teach . **THE LIGHTED , WERE IN FACT , TO LIGHTEN** . She even opened a Boarding School for girls at Darzo village , which unfortunately , was closed down due to the Second World War .

She served the Mizo people , uplifting their lives , working miracles , changing lives , for over thirty years . By 1952 , she retired to Kotagiri Hills in Tamil Nadu , from where she was able to visit Mizoram twice . She had love for the Mizo people ; she couldn't have loved them more . Her love has brought light to thousands of lives , including us , the

students of this college . She passed away as an eighty two year old lady , in 1970, 2nd November. She was laid to rest in an European Cemetery , Kotagiri , where Mizos would visit to pay respect to the departed Missionary .

Though the celestial Miss Edith Mary Chapman (Pi Zirtiri) was laid to rest , her light continued to shine . Pi Lalziki Sailo , an adopted daughter of the late Pi Zirtiri , was a bearer of the light. She had been taken to England thrice , where she remained for four years .

She finished High School at St Johns Diocezon Girls High School , Culcutta , in first division - with distinction in History . She passed B.A from Women's Christian College . She is also the first Mizo woman to pass B.T and the first in the whole of Assam to pass M.Ed from Delhi University . She also became the first Mizo women member of the first District Council of Mizoram ; she is the first Mizo to be a member of the Gouhati University Court. During her service in the

Government , she took interest in women's Welfare and Education . By 1979 , she deputed as a Deputy Director of Education. Pi Lalziki Sailo , along with her husband Pu Lallianzuala ,in 1980, started Zirtiri Women's College in their compound !

It was 1980 , June , and the first organizing committee was set for the newly formed College . Initially , 45 admission forms were filed , and 17 scholars successfully attended the first class , which was commenced in August , 1980 . Time flew , and by God's grace , it was upgraded to a Co-ed Science College in 2000 ! It has been running prosperously - providing opportunities and honor to students that have set foot on the college. As of 10th August , 2018 , there are currently 608 students studying in the college ; with eleven Departments , and a new campus currently under construction at Durtlang ,Aizawl .

The light lit by the departed Miss Edith Mary Chapman (Pi Zirtiri) lived on , on to Pi Lalziki and ceaselessly continued . Now , the light is

bestowed upon us - on me , on you . It is a the light - to change someone's life , the way
duty for us , the enlightened ones , to pass this college changed ours.

HE, WHO CHANGED THE WORLD

- *Nick Lalrinmawia* ,
6th Semester , Botany .

Martin Luther King Jr. will always be remembered for his dignified, passive resistance to an unjust society while Nelson Mandela dedicated his life to fight against a policy which kept black and white South Africans apart. Mahatma Gandhi became a great political leader, changing India. William Shakespeare, on the other hand, introduced more than 1,700 new words to the English language. Over the past, few of many men have stood up to change the lives of many. Of all, it was Jesus Christ, Jesus of Nazaret, who started a revolution that would change the world. To a majority of people in the world, Jesus is an honoured historical figure, the founder of Christianity.

However, many have no idea that his life had an unrivalled impact on the history of man. He taught a message of love and forgiveness during the brutal period of Roman occupation – His Christian ideals would later be adopted by the Roman Empire, ensuring the spread of his philosophy all over Europe. Without his birth, death, resurrection and ascension, life on planet earth would be incomprehensibly different from what it is now. The degrading status women have had in religion and ancient times in general need not be explained. Throughout history many women had brought change to the condition of women in their respective societies,

however , no one had ever altered the role of women in society more than Jesus . When the Pharisees seized a woman in act of adultery , she was to be stoned , to death ! As that was how they acted upon sinners during such period , but Jesus showed God’s grace and love in an extraordinary way as he said “*Neither do I condemn you ; go , and from now on sin no more .*” His act of forgiveness left the judgemental Pharisees in awe . He had also taught the truth that from the time of creation , women are of equal worth as men in God’s sight , as written in Galatians 3:28 “ *There is neither male nor female , for you are all one in Christ Jesus .*” And believers of Jesus treat women justly , unlike other religion where women are considered as second class citizens . “ *So God created mankind in his own image , in the image of God he created them ; male and female he created them .*” (Genesis 1:27) You can thank Jesus Christ for the freedom you so dearly enjoy .

Did you know that this college , Government Zirtiri Residential Science College , was

initiated by a follower of Christ in hopes for the advancement of the Christian faith ? As such, universities such as Princeton , Yale and Harvard all began as Jesus-inspired efforts ! In fact , Harvard University was named on behalf of its first benefactor, Rev. John Harvard , who left his personal library and half his estate to the new institution . Yale University/College was also initiated by Reverend John Davenport , a religious man who dreamed of establishing a college . He led a group of ten ministers that donated books for the initiation . The ancient world relished education but tended to reserve it only for the superior . Jesus’s teaching that every child bore God’s image helped fuel the progress for universal literacy without discrimination in race , sex , etc. Also , studies in history have revealed that we would have lost much of the great literature of the ancient world if it weren’t for the Christian monks , followers of Jesus , who preserved it – it was believers that started the first universities . As such , Pi Lalziki has initiated this very college , as she was inspired by Pi Zirtiri (Miss Edith Mary

Chapman) , who was a missionary - a follower of Jesus' teaching . Accessible , for you , for me , through Jesus .

The ancient Greek philosophy as well as the religious leaders of Israel in Jesus' time preached to suppress the individual's opinion and voice , as they profess that only the particular society , state or tribes are important . But Jesus did not allow the weak to be crushed , as he taught that every person is important in God's eyes , even the sinner and the rejected . Before Jesus , common citizens were not given proper rights , men were killed ruthlessly , as people lived in fear of massacres and tyrants . Power and fear controlled human societies for much of human history . " *Live as free people , but do not use your freedom as a cover-up for evil ; live as God's slaves .*" (Peter 2:16) After Jesus , his teaching were applied to human government and it changed the way rulers acted out on their citizens . Look at the difference between the Christian countries and the Muslim countries , and you will

instantly understand how far-reaching was Jesus' influence on freedom . If you are living under Christian rule , thank Jesus – for there are countries that do not understand freedom and equality as you do now .

In ancient days , art was confined and used mainly to praise and glorify kings and rulers . Jesus brought healing , peace and fullness to thousands of artists that began reflecting their wholeness in art forms . After Christ's death and resurrection , it brought wholeness to individuals and nations as people began producing major chord music and realistic art – an expression of their reconciliation to God . As such , art became a public property . In fact , since the beginning of history , no book has ever inspired as many pieces of art as the Bible has – from classical music composition to the most famous paintings in any museum . Most famous paintings like ' *The Last Supper* ' by Leonardo da Vinci , ' *The Sistine Madonna* ' and ' *The Transfiguration* ' by Raphael are Jesus-inspired . In fact , ' *Salvatore Mundi* ' , meaning Saviour of the

World, a painting of Jesus by Leonardo was auctioned for 450.3 million dollars, breaking record for the highest paid art piece. There really is no rival to the artistic influence of Jesus's life and his words. "*Do not be drunk in wine but be filled with the Holy Spirit, speaking to one another in psalms, hymns, and spiritual songs, singing and making melody in your heart to the Lord.*" (Ephesians 5:18-19)

Jesus granted permanent power and completeness to the world's most significant institution – the family. Wives were not to be treated as slaves, husbands need not be tyrant and all children possessed importance. Jesus' teaching of equal worth, partnership, equality, and self-sacrificing love permits harmony and protection to family connection that became the foundation for a happy family. "*Wives, submit to your husbands as to the Lord ... Husbands, love your wives just as Christ also loved the Church ... Children, obey your parents in the Lord for this is right.*"

(Ephesians 5:22, 25 ; 6:1)

Jesus lived a life of absolute faith in the Father and bestowed faith to his followers. Faith in him has guided his followers through centuries to care for the poor, the sick, to start hospitals and schools, to share the love of God to the world. It is their faith that makes them the best leaders, soldiers, husbands and wives. Life would be dark without faith in God. Majority of hospitals and ministries have been launched worldwide in Jesus' name. "*that Christ may dwell in your hearts through faith.*" (Ephesians 3:17). Jesus Christ gives hope, a hope that is not a wish nor a dream - but a hope that gets them through the darkest day, through the darkness, through death! The love of Jesus Christ has made the greatest mark upon the world.

The essence of Jesus' goal was to save the individual life of every person who chooses to lay his or her trust in him. He vowed that when we were born again by his Spirit, he would live inside of us. That we would be

set free from the law of sin and death . It is “ *For God so loved the world , that he*
the Spirit of Jesus Christ in millions , and now *gave his only Son , that whoever believes*
billions of people that has changed the *in him should not perish but have eternal*
landscape of history through changing *life .”* (John 3:16)
individual lives .

TRUE LOVE

- *Lalrinsangi Nghinglova ,
Associate Professor,
Department of English*

She lies weakly on her bed, staring blankly out of the window. The soft drizzling sound of the rain brings back memories of her past. It was a rainy night when she said goodbye to the love of her life. Cameron, the name that brings back feelings she had been fighting for so long. Now on her death bed she can no longer fight back her feelings. Her sickness has rendered her too weak. She no longer has the strength to fight back memories of him. She gives herself the pleasure of thinking about him for the last time.

Three years ago on a night like this, she had called him to have the most painful discussion of her life. The heavy knock on the door

resounded in her mind and memories come flooding back, drowning her in tears. She had opened the door to let him. All wet from the rain, she lovingly dried him and poured him hot coffee. Every little action, yes every minute detail replayed itself in her mind. He had sensed her sadness, but he had held himself back from asking for fear of hearing the worst. But still it came out slowly from her mouth as she stood facing him, yet avoiding his eyes.

“Cameron, I have something I must tell you and it can’t wait”.

“What is it Lia?” he had asked.

“Our times together had been the best years

of my life and nothing . . . no one could give me more happiness than you did”

“Go on,” Cameron urged, getting a little impatient.

“Well, they say, all good things must come to an end . . . she continued.

“No, no . . . I know what you are trying to say and I don’t want to hear it,” Cameron interrupted.

“Please, let me continue, don’t make it more difficult for me,” she had pleaded, tears welling up her eyes.

“There is some else and don’t ask me who because it doesn’t really matter. I have loved you and will still love you in my own special way. But we don’t always own the things we love.

Cameron dropped on his knees, too shocked to say anything.

Lia continued, “One day you will thank me for what I have done to you”.

Cameron, angrily, “you tell me you want us to part and yet you say that I will be thanking

you. How can you say that?”

“It’s painful, I know, but if you really love me you will respect my wishes”

He had walked out angrily.

She never saw him again. Not once, in the three years since they parted.

Meanwhile, Cameron had made up his mind never to give his heart to anyone else. He concentrated on becoming what he had always aspired for. A singer. To entertain a crowd. He worked hard in pursuing his dream. Not long did he need to get the attention he deserved. People loved his music. The love and support he got made him stronger and better. He had a whole career and a bright future in front of him.

Constant travelling, facing interview to interview, performing at concerts and award shows-this was the life he had made for himself. Fame, wealth, beautiful girls, he had them all. Yet something inside him had permanently died since Lia left him. He laughs but his heart still cries because fake happiness is the worst kind of sadness.

Lia's tragedy began on that day, three years, when she got a call from her doctor.

"Can you drop by at my clinic in the afternoon?" Dr. Brent had called her in a rather serious tone. "And please bring someone with you when you do," he had continued.

She was sure something was seriously wrong with her. She had been feeling weak for some time. Slight fever in the evenings and that awful nauseated feeling now and then. She had been ignoring her symptoms for sometime until it became worse. She had no choice but to see her doctor.

Lia picked up enough courage to meet her doctor. She took Andrea with her because her parents were too old. The only child of an elderly couple, Lia took great care of her parents and did not want to worry them unnecessarily. She had thought about taking Cameron but he too would be over worried, so, she decided to take her best friend Andrea with her.

At the clinic she took her place near the

window, worried, anxious and a little scared of what Dr. Brent will say to her. Her cold hands shook a little until Andrea's warm embrace and smile comforted her. "It will be alright," she had said.

The gentle voice of the receptionist calls out, "patient number 12 Miss Lia, the doctor is ready to see you".

The grim expression on the doctor's face lit up a little as Lia entered.

"Please take a seat, Lia".

Thank you, Doctor and Oh..... this is my best friend Andria".

"Hello, please take a seat next to your friendum.... I suppose she is your confidante.....?"

"Yes Doctor she is like a sister to me"

"I will not waste your time.... but there is something I need to ask you?"

"Have you done anything in the past that you wish to hide.... I need you to be honest"

"Like what, doctor....you mean drugs and stuffs?"

Dr. Brent nodded.

“Well, I am proud to say I have a clean past”

Dr. Brent becoming thoughtful, “and blood transfusion then?”

That was it. That was how she got the dreaded disease. She had gone on a holiday to Africa when she got hit by a hit and run car. There was no time to waste. She had to be given blood as quickly as possible. The hospital was not very clean but she had no choice but to receive blood if she wanted to survive. It was so ironical that the blood meant to save her would bring about her doom two years later.

“You are unfortunately infected with HIV Virus” Dr Brent had told her sadly.” But do not panic, medicines have improved and if you maintain a healthy lifestyle you will live a normal life”.

“Normal life? How can anyone live normally with the deadly virus and what about Cameron? How will she tell him? How can she carry on her relationship with him?

Life never remained normal since that day.

She must let go of Cameron. If she tells him about her illness she knows he will not leave her. She will have to hurt him in the worst possible ways so that he leaves her for good.

That’s why she told him there was someone else on that rainy night three years ago.

The incessant rain brings back memory of that night Lia said good bye to him. He is in his room lying on his bed, his phone switched off and thrown on the floor, TV on but volume down, stuff thrown everywhere, his mood swinging from upset to angry and then utter confusion. His eyes red from crying and the door locked so no one can bother him. Replaying their last conversation in his head, thinking of what to do but not sure, whatsoever. He missed every moment he had with her.

A gentle knock on his door jolts him out of his deep thought.

“Cameron it’s me, Andrea”

He reluctantly lets her in.

She sits down, catches her breath and looks at him seriously.

“You have to see Lia for the last time”, she manages to tell him as she breaks down.

“She doesn’t want me to see her, so why should I? he replied shortly. “Besides she must be married to the man she left me for”

“There was never any other man; you were the only man she ever loved”.

“Ha.... You must be joking ... she asked me to leave because she said there was someone else”.

Andrea sighs, “she said that because she loved you and she had to let you go. You see..she became infected with AIDS from blood transfusion and she knew the only way you could let her go was by lying to you. She wanted you to be happy without her ... she loved you selflessly”.

“What What are you saying? Are you joking? Why didn’t she tell me the truth?”

“There were many things she wanted to tell you but she knew they would hurt you. So she buried them inside and let them hurt her instead. She had no will to live since she left you and now she is dying. You have to see her one last time.”

And so they leave for the hospital half excited, half scared.

As he walks in, she raises her eyes to meet his. She knew she still loved him and that was enough for her. He picked up enough courage to speak to her.

“Hello, Lia,”

“Hello, Cameron”. Lia replies softly as tears trickle down her face.

For a moment there was silence again.

“I’m sorry to see you like this, Lia.”

“I’m the one who is sorry... I thought letting you go would be the best choice ... but then why does it feel like it’s the worst,” her voice cracked.

Cameron takes her hand and gently tells her “not a day goes by when I don’t think of you, even though thinking of you makes it hard to breathe and remembering the old times brings a certain sadness I cannot let go. Yet, thinking of you makes me happy because when I picture your smile I remember it was once because of me”.

“Cameron, I still love you and that’s all I can feel, I still miss you that’s all I can say,” she said tiredly.

“I love you too, I just want you, that’s it.” He said as he stared at her like she is the most beautiful thing in the world. Sometimes the eyes can say more than words.

“Cameron, can you hold my hands one last time”?

He takes her hand and places them on his chest “it’s okay,” he tells her “if you want to go.

Everyone wants you to stay. I want you to stay more than I’ve ever wanted anything in my life”. His voice cracks with emotion. He stops, clears his throat, takes a breath, and continues. “ But that is what I want and that might not be what you want. So I just want to tell you that I understand if you go. It’s okay if you have to leave us. It’s okay if you want to stop fighting.” And he kisses her softly on her forehead. She closes her eyes and

smiles. She finally finds peace. Peace because she has reconciled with the love of her life. Now she can stop fighting and let go of her life. She takes a deep breath, the last breath she is ever going to take as heart stops beating.

Utter chaos in the room with loud heartrending cries continue for about an hour.

Then the crying stopped.

There was silence.

Silence, except for echo of the tired footsteps of Cameron as he walks down the corridor to face the world alone until he meets her again in the after – life. A short smile crosses his face as he blinks away his tears. He had lost Lia for the second time, but this time he smiles because he is now comforted with the knowledge of Lia’s undying love for him.

2019 - INTERNATIONAL YEAR OF THE PERIODIC TABLE OF CHEMICAL ELEMENTS

- *Dr. Lalsaimawia Sailo,*
Asst. Professor, Dept. of Chemistry,

*“In a dream I saw a table where all the elements fell into place as required.
Awakening, I immediately wrote it down on a piece of paper.”*
- Dmitri Mendeleev (1834-1907)

The United Nations designates specific days, weeks, years and decades as occasions to mark particular events or topics in order to promote, through awareness and action, the objectives of the Organization. The United Nations General Assembly during its 74th Plenary Meeting declared 2019 as the International Year of the Periodic Table of Chemical Elements (IYPT 2019) on December 20, 2017. Based on the 202 EX/Decision 43, the IYPT 2019 was approved by the UNESCO General Conference at its 39th Session (39 C/decision 60).

The initiative for IYPT 2019 is supported by IUPAC in partnership with the International

Union of Pure and Applied Physics (IUPAP), European Association for Chemical and Molecular Science (EuChemS), the International Council for Science (ICSU), International Astronomical Union (IAU), and the International Union of History and Philosophy of Science and Technology (IUHPS). It was submitted by numerous organizations from over 50 countries around the world.

1869 is considered as the year of discovery of the Periodic System by the Russian scientist, Dmitri Mendeleev. The IYPT 2019 also celebrates the 150th anniversary of the development of the Periodic Table of Chemical Elements. The International Year

aims to recognize the importance of the Periodic Table of Chemical Elements as one of the most important and influential achievements in modern science reflecting the essence not only of chemistry, but also of physics, biology and other basic sciences disciplines. The IYPT 2019 is an opportunity to reflect upon many aspects of the periodic table, including its history, the role of women in research, global trends and perspectives on science for sustainable development, and the social and economic impacts of this field.

About 200 years ago, scientists were discovering lots of new elements. Attempts were made to classify the elements in a number of ways like Dobereiner's triads, De Chancourtois classification, Newlands law of octaves, Lothar Meyer's arrangement. In 1869, Mendeleev made a remarkable contribution to the classification of elements. In honour to him, I will briefly mention about the story of Dmitri Mendeleev.

Dmitri Mendeleev (1834-1907)

Early life

Dmitri Ivanovich Mendeleev was born on February 8, 1834 in the village of Verkhnie Aremzyani, near Tobolsk, in the Russian province of Siberia. Dmitri was

part of a large family and he had more than 10 siblings, the exact number is not known. His father Ivan Pavlovich Mendeleev was a teacher of fine arts, politics and philosophy. Unfortunately for the family, Ivan went blind and lost his teaching position. His mother Maria Dmitrievna Mendeleeva restarted her family's abandoned glass factory to support the family. Dmitri's father died when he was only 13 and two years later his mother's glass factory was destroyed in a fire leading to a financial crisis in the family.

Education and career

Dmitri Mendeleev initially attended the Gymnasium, or a school with strong emphasis on academic learning, in Tobolsk.

In 1850, at the age of 16, the Mendeleev family moved to the Russian capital St. Petersburg. Here, he entered the Main Pedagogical Institute, a teacher training institute from where his father had also graduated. In 1855, Dmitri graduated with a gold medal. After briefly occupying a teaching position at Simferopol in Crimea, Dmitri returned to St. Petersburg and earned a Master's degree from the University of St. Petersburg for his study of silicates, in 1856, at the age of 22. He won an award to go to Western Europe to pursue chemical research. He stayed in Europe for two years from 1859 to 1861, spending most of his time at the University of Heidelberg in Germany.

After his time in Europe, Mendeleev believed that Russia was trailing behind in the science of chemistry. In 1861, he published his textbook *Organic Chemistry* which won him the prestigious Demidov Prize and put him at the forefront of Russian chemical education. Mendeleev became a professor at Saint Petersburg Technological Institute and Saint Petersburg State University in 1864 and 1865 respectively. He was one of the founders, in 1869, of the Russian Chemical Society. His renowned work *The Principles of Chemistry*, was published in two volumes (1868–71). It became the definitive

textbook on the subject and was widely translated. By 1871, Mendeleev had transformed St. Petersburg into an internationally recognized centre for research in Chemistry.

Classification of elements

In 1869, while preparing the second volume of *The Principles of Chemistry*, Mendeleev attempted to classify the elements according to their chemical properties and noticed patterns. He wrote the name of all the known elements with their fundamental properties, including atomic weight, on cards. He noticed that the behaviour of elements seemed to repeat as their atomic weights increased. The legend goes that, while trying to figure out a pattern he fell asleep at his desk and when he awoke, he

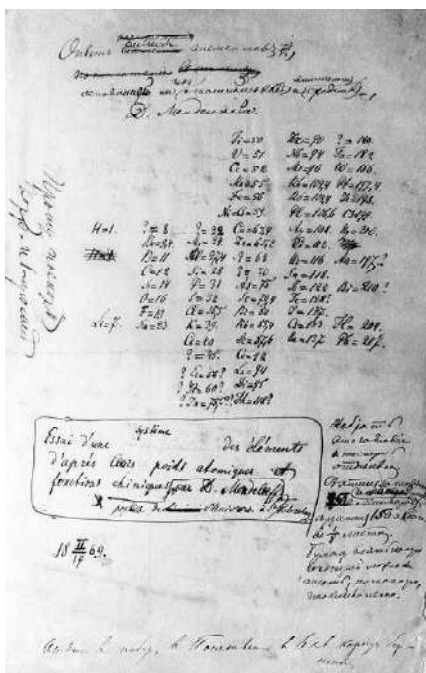

knew the complete arrangement of the elements. It is proposed that his subconscious mind did the trick for him. Mendeleev did claim the dream story according to certain sources but other sources regard it as untrue. On March 6, 1869, Dmitri Mendeleev made a presentation to the Russian Chemical Society in which he stated his periodic law, which states that when elements are ordered according to their atomic weights, certain properties of elements repeat periodically.

Pic 4: Mendeleev's Periodic Table (1871)

Mendeleev was not the first to arrange the elements according to their atomic weights, neither was he the first to notice periodicity of elements. However, he was the first to publish a periodic table that closely resembles the modern one and more importantly, it was his efforts that popularized the Periodic Table. Mendeleev made two spectacular predictions. Firstly, he put the elements in their correct places despite some atomic weights being incorrect at the time and rightly predicted that these atomic weights had been measured incorrectly. Secondly, he left gaps in his periodic table for elements which were not yet discovered and predicted the properties of these elements. The Periodic Table gained acceptance in the scientific community in the following two decades with three elements predicted by Mendeleev being discovered with properties closely matching what he had predicted. It is due to

Pic 3: Mendeleev's handwritten Periodic Table (1869)

these contributions that Dmitri Mendeleev is considered the Father of the Periodic Table.

Element 101 was named Mendelevium (Md) in his honour

Pic 5: Dmitri Mendeleev in 1897

Mendeleev was awarded the Davy Medal and the Copley Medal by the Royal Society of London in 1882 and 1905 respectively. He was elected

a Foreign Member of the Royal Society in 1892 and in 1893 he was appointed director of Russia's Bureau of Weights and Measures, a post which he held till his death. Dmitri Mendeleev died on February 2, 1907 in Saint Petersburg due to influenza. He was just a few days away from turning 73. Element with atomic number 101, which was discovered in 1955, was named Mendelevium (symbol Md) after Mendeleev. Also a crater on the Moon is named Mendeleev in his honour. Dmitri Mendeleev is considered one of the most influential chemists in history.

MEMORIES WILL LINGER

17th May, 2019, Monday.

*Laltanpuia
Principal, Gzrsc*

For Zirtirians, today is the first day we had spent a day without our college driver Pa Zira.

This morning, as I reached the college, I looked at the bus... too many memories and journeys of Pu Lalzira (a.k.a Pa Zira) etched here within this old faithful, yellow wonder.

I am sure this thing would have wept aloud as I stood beside it - if it is a mere mortal like us! Wasted leaves and fallen Mayflower petals upon its back and around its brows. I still think it weeps, shedding silent tears.

He has are left us for good. We all acknowldege that he has always been our utility man, our faithful handyman.

He was a light in the corner. With his departure, darkness has enveloped that corner.

We Zirtirians, past and present employees, students and alumni cherish the deeds and contributions of Pa Zira towards the survival of this institution. Memories will linger.

It has been an honour to have you with us while you were here.

Farewell, quiet soul...

Requiescat In Pace.

"The first step toward success is taken when you refuse to be a captive of the environment in which you first find yourself."

- Mark Caine

"Would you like me to give you a formula for success? It's quite simple, really: Double your rate of failure. You are thinking of failure as the enemy of success. But it isn't at all. You can be discouraged by failure or you can learn form it, so go ahead and make mistakes. Make all you can. Because remember that's where you will find success."

Essay (English)

HONESTY IS THE BEST POLICY

(1st position in essay writing competition (English) held during the college week)

David Lalrinnunga

5th semester, Geology

Honesty is the best policy' a very famous line, from an old story which our parents would read to us, the story of a poor wood-cutter who had an old rusty axe. Skipping to the end we see that because of his honesty, the Goddess gifted him with two oxes, silver and gold ones. And later his friend heard his story and tried the same. But he was a dishonest one and due to that he lost even his own axe.

From the above paragraph we can clearly see that honesty is good. From our childhood days our parents would tell us 'lying is bad', 'be honest', which is actually true.

Lying is never a good thing, one may get away with something by lying his way out, but that will surely affect him in his later life, as the saying goes, 'A lie is always followed by the truth'. It may take days, months, years, but that lie is always uncovered.

For us Christians, lying goes against the Bible, God forbids us from lying, He teaches us to be honest. An example can also be seen in the Bible, about the couple who died right after they told a lie. Even from an atheist point of view or for superstitious people, when you're being dishonest, you feel this guilt inside you, and this stays inside you for a while

until maybe you suppress it with other things. Another thing, there's this term called karma, mainly it means, if you're being dishonest or bad, that bad deed cycles back to you, an old Buddha teaching. Honesty isn't hard, yes of course the truth may hurt sometimes, or telling the truth may be hard, like when you have a bad grade and you have to get your parent's signature. You got scared and you just forge their signature. And when the teacher goes through it again you feel scared that they'll find out, you feel agitated and all.

Why not just show your parents your paper and be done with, maybe they will scold you a few times, it doesn't hurt that much. That is a thing, an early stage of dishonesty in our life we have to control.

The perks of being an honest person is that, you feel fine, you're happy, you're carefree. Recalling the pervious paragraph, whe you're being dishonest, you feel something, that is a

bit off, in the back of your mind, you don't feel quite easy. Being honest is also psychologically good for the mind, you feel refreshed and calm. In life, you will be tackled with many hardships, times when you have to tell lies or especially with money, corruption. In those times, do not let your greed take over, because, the main reason for dishonesty is greed. Think about your decision cleary, weigh your decisions, as they say it. Think about what results it may bring, what consequences will it bestow upon you.

In all the things said, my final request is, be honest, the world today as we know it is deteriorating by the day. People are bad, literally. Good people are hard to find these days, and are valuable. Be good to your neighbours, be honest with each other. Rid the world of dishonesty, and finally, be honest with yourself. This really means a lot, and remember, **'Honesty is the best policy'**.

CHOICES

I didn't choose it
I didn't wake up one day and tell myself
let's be anxious
let's be depressed
let's want to die
let's start self harming
I didn't choose to be like this

slowly my problems
my monsters
became visible
they started small
skipping lunch
making a cut or two on my hand
shaking for a while in school
but I fell

I didn't choose to be this person.

We just get handed who we are.

I didn't choose this.

I never wanted to be that

I didn't want to be riddled with anxiety and insecurities,
to wallow in self-pity and sleep for hours everyday
to stay up all night with anxiety
to steal razors
to eat one-hundred calories and then barf it back up
but that's what happened.

I didn't choose this

I didn't choose

I didn't choose to tear apart my life.

it just

happened

A POET'S LOVE

(1st position in Poetry Writing Competition (English) held during the college week)

What is this thing we call love?
An abstract sent from above. (maybe)
Shouldn't love be a lovely dovey thing.
Or just simple daily dully things.
The way I see it.
Some may not find fit.
A pointless journey between two.
Hugs and kisses, they usually do.
A tale of a man, quite lonely.
Who spends his life regretting a silly folly.
A broken heart, turned into shards.
It made him dark, his life grew hard.
Affection he seeks, from the people he meets.
But the scar he had only made him mad.
A Golden boy he was, fresh and lovable.
Now a man of despair, vile and despicable.
What will become of him, no one knows,
Maybe what he needs, is a person who believes.
Time can only tell, what product this may lead.
Know this is a tale, of a poet who are believed

SHE'S DONE

She's done

How could she have been so stupid

Her romantic heart so desperate to to believe

So it did

for what

To be shattered yet again

For the illusions of thinking that

their is only one solitary soul,

one soul who will love her

Love her wholeheartedly

Love her the way she loves

What did she do wrong

Besides falling in love

Nobody is who they say they are

Nobody truly cares

Fake people living fake lives pretending to care,

But theres one, emmanuel the alpha and omega

To go a lifetime of giving herself entirely to only receive love in
half measures

Then to fall because it felt so real

Hours upon hours upon months

Everything and more gone in a blink of an eye

A lifetime of rejection and then this, it felt so right

If this is a lesson she must learn, then she had enough

How many heartbreaking lessons must she endure?

No more, she's done..!
