

### **Report on “Motivational Talk and Interactive Session with University Toppers”**

The department of Biochemistry organized an interactive session on 16<sup>th</sup> August, 2021 10:40 am with two University Toppers from our college. Google meet platform was used for the programme. The session was organized for the 3<sup>rd</sup> semester Biochemistry students. The speakers invited for this session were Malsawmkimi, Gold Medalist BSc and Lalramnghaka, Subject Topper in Chemistry. The main aim of the programme is to motivate the students by learning the best practices of their successful seniors.

The two speakers each gave a 15 minutes speech where they mostly shared about how they prepared for their examinations, they also shared valuable life lessons which they themselves have followed in reaching their goals. Students and teachers asked questions and interacted with the two speakers each after their respective speeches.

The programme was a success as we had a very fruitful interactive session. Programmes like this would be worth repeating for the years to come.
